

April 11 - Meeting Notes

Date of midterm: April 19, Sunday, 11:00

Online, multiple choice, 10 questions, 15 minutes and open books/notes

About Project Report

Project report should contain the following elements:

Title Page

Contents

Introduction

- A short summary of the whole process (what did you plan, how is your design, what kind of methods or tools or platforms or hardware or software did you used, and finally what did you get)

The body of the report

- Aim and importance of your project
- Timeline
- Risk Analysis
- Similar works and comparison (additional features of yours)
- Design of the project (components, interactions, transactions, dataset, database, client-server ack., UML(s) etc.)
- Details of design steps
- Test cases and system response

Conclusions

- Strongest and weakest points of the project
- Future works

References

Appendices (if appropriate)

Convert to your reports a pdf file, then upload that pdf.

One copy for each group is enough.

About Project Presentation

- 10-15 minutes zoom meetings with jury
- Just product base (no more details about the process)

Deadline for report submission: 15 May, 23:59

Presentations: 16-20 May
